📄 sintiasnn

Experience

Zero One Group, Infrastructure Engineer

- Implementing version control and CI/CD pipelines on GitLab for application updates.
- Spearheading AWS setups and optimizing resource allocation for scalability.
- Utilized Docker for containerization and orchestration of applications.

Jakarta, ID
Oct 2024 – present
1 year 7 months

PukulEnam, Devops Engineer

- Implementing version control and CI/CD pipelines on GitLab for application updates.
- Spearheading AWS setups and optimizing resource allocation for scalability.
- Utilized Docker for containerization and orchestration of applications.

Denpasar, ID
June 2025 – present
1 year

GITS Indonesia, Devops Engineer

- Implementing orchestrated version control and CI/CD pipelines on GitLab for application updates.
- Spearheading GCP project setups and optimizing resource allocation. This involved fine-tuning compute instance sizes, database configurations, and networking components based on actual usage patterns, resulting in a more cost-effective and scalable infrastructure.
- Utilized Docker and Kubernetes for containerization and orchestration of applications, improving scalability, deployment speed, and resource utilization.

Bandung, ID
Mar 2024 – Oct 2024
8 months

Alterstay, Backend Engineer (Cloud Concentration)

- Implementing orchestrated version control and CI/CD pipelines on GitLab for application updates.
- Spearheading GCP project setups and optimizing resource allocation. This involved fine-tuning compute instance sizes, database configurations, and networking components based on actual usage patterns, resulting in a more cost-effective and scalable infrastructure.
- Terraform's modular IaC boosted development scalability, simplifying resource management and enabling parallel work on different infrastructure components like databases, compute, and networking.

Badung, ID
June 2023 – Oct 2024
1 year 4 months

Bangkit Academy led by Google, Goto, and Traveloka, Cloud Computing Mentor

- Fostered a collaborative learning environment by encouraging knowledge sharing, providing constructive feedback, and fostering a culture of continuous improvement within the organization
- Mentored 25 participants, providing personalized guidance and support throughout their learning journey
- Led weekly consultations covering reminders, sharing sessions and discussions related to cloud computing

Jakarta, ID
Feb 2023 – Jan 2024
11 months

Department of Informatics, Udayana University, Laboratory Assistant - Algorithm and Programming

Jakarta, ID
Mar 2021 – June 2021
4 months

- Collaborate with the lecturer to present engaging and practical materials on algorithms and programming to a diverse audience of around 100 students.
- Facilitate interactive sessions, emphasising the fundamental aspects of the C language, including structures, selection, looping, arrays, pointers, functions, and file operations.
- Support the lecturer in efficiently recapping and analyzing the final grades of all students enrolled in the course.

Education

Universitas Udayana, Computer Science

Badung, ID
Aug 2019 – June 2023

- GPA 3.68/4.0
- Relevant Subject in Operating System Practicum, Data Structure, Data Communication and Computer Networking

Skills

Cloud & Infrastructure

Automation & CI/CD

Observability
